

Childrens Past Lives: How Past Life Memories Affect Your Child

Has your child lived before? In this fascinating, controversial, and groundbreaking book, Carol Bowman reveals overwhelming evidence of past life memories in children. Not only are such experiences real, they are far more common than most people realize. Bowman's extraordinary investigation was sparked when her young son, Chase, described his own past-life death on a Civil War battlefield--an account so accurate it was authenticated by an expert historian. Even more astonishing, Chase's chronic eczema and phobia of loud noises completely disappeared after he had the memory. Inspired by Chase's dramatic healing, Bowman compiled dozens of cases and wrote this comprehensive study to explain how very young children remember their past lives, spontaneously and naturally. In *Childrens Past Lives*, she tells how to distinguish between a true past life memory and a fantasy, offers practical advice to parents on how to respond to a past life memory, and shows how to foster the spiritual and healing benefits of these experiences. Perhaps the most moving, convincing, and best-documented evidence yet for life after death, *Childrens Past Lives* will stand alongside the classics of Betty J. Eadie, Raymond Moody, and Brian Weiss in its power to comfort, uplift, and transform our thinking about life after death. From the Paperback edition.

This book argues passionately for the existence of past lives and for the special abilities of young children to recall their pre-birth memories. - Publishers Weekly. When her young sons hysterical fear of loud noises is cured by past life regressionist Norman Inge, and her daughters fear of house fires is likewise laid to rest, Why might some children recount apparent past life memories with such vividness? *Return to Life: Extraordinary Cases of Children Who Remember Past Lives*, . It arrived just aChildrens Past Lives: How Past Life Memories Affect Your Child eBook: Carol Bowman: : Loja Kindle.The most obvious was the young age at which children talked about past lives. Generally, these memories are most vivid between the ages of two and five. Cross-culturally, regardless of the parents beliefs, these memories tend to fade around the age of seven. (I have found this to be true in American children, too.)
