

Gluten-Free Teens: Dont Let It Slow You Down

When you're a young kid, and you tell people that you don't like to eat sandwiches, they think that you're crazy. You're a picky eater. Your taste buds just need to adjust. When you spend five years packing your lunch box every day for school with things like black beans, sweet potatoes, and other non-bread-containing items, they think that you're simply independent, and like to eat a variety of non-traditional lunch items. But then, at the age of eleven, when you're diagnosed with celiac disease, people begin to realize that maybe you weren't crazy after all - maybe your body was trying to tell you something, and you subconsciously followed its directions. Celiac disease is an auto-immune disorder that makes a person's digestive system unable to tolerate gluten (a protein found in many common grains such as wheat, barley, and rye). Here, I am attempting to provide what I believe to be the most important tips for living with celiac disease - specifically for kids and teens.

Plus this cauliflower chowder is also gluten free, so it's perfect. So let's put on the soup pot and give this creamy cauliflower. Bring this to a boil, and slow the heat down to a simmer.
