

Prostate Cancer: If or When?

A look at the importance of early testing for prostate cancer. Special emphasis is for African American men because they have the highest rate of prostate cancer.

Having prostate urinary symptoms can be a sign of prostate cancer but more often they are caused by a harmless enlargement of the prostate, which is common. It's not acceptable that we are seeing 40 per cent of prostate cancer diagnoses in the late stage, and a mortality rate that is unnecessarily high. Prostate cancer age. As mentioned above, age is a primary risk factor for prostate cancer. The disease occurs most often in men older than age 65. In fact, according to The Prostate Cancer Foundation, only 1 in 10,000 men under the age of 40 will get prostate cancer. The prostate gland is located below the bladder and in front of the rectum. The prostate gland is part of the male reproductive system. Prostate cancer is the most common cancer in men. It is treatable if diagnosed early, before it spreads. See your health care provider if you have any of the symptoms listed here. About 1 man in 7 will be diagnosed with prostate cancer during his lifetime, but only 1 man in 39 will die of this disease. About 80 percent of For many prostate cancer patients, the treatment decision is less about choosing a life-saving option and more about protecting their quality of life after treatment. Doctors use diagnostic tests to find out the cancer's stage, so staging may not be complete until all of the tests are finished. Staging for prostate cancer also A Gleason score of between 2 and 6 is a low-grade prostate cancer. It is likely to grow very If you're a man, the federal government estimates that you have about a one-in-seven chance of developing prostate cancer at some point during your lifetime. Prostate cancer is the development of cancer in the prostate, a gland in the male reproductive system. Most prostate cancers are slow growing however, some Clinical staging of prostate cancer is based on the pathology results, physical examination, PSA, and if
