

ZELNORM Tablet: Treats Irritable Bowel Syndrome in Women, and Stomach Pain in Women and Men with Chronic Idiopathic Constipation

Although, your health condition may impact your everyday life, do not let it define who you are. ZELNORM is a medicine for (1) The short-term treatment of women who have irritable bowel syndrome (IBS) with constipation (not enough or hard bowel movements) as their main bowel problem. Zelnorm does not work for all women who use it. Zelnorm has not been shown to work in men with IBS with constipation; (2) The treatment of patients less than 65 years of age with chronic idiopathic constipation. Chronic constipation means constipation lasting over 6 months. Idiopathic constipation means constipation not due to other diseases or drugs. Zelnorm has not been shown to work in patients with chronic idiopathic constipation who are 65 years of age or older. Zelnorm increases the movement of stools (bowel movement) through the bowels. Zelnorm does not cure IBS with constipation or chronic idiopathic constipation. For those with IBS with constipation who are helped, Zelnorm reduces pain and discomfort in the abdominal area, bloating, and constipation. For those with chronic idiopathic constipation, Zelnorm increases bowel movements, reduces straining, bloating and abdominal discomfort. If you stop taking Zelnorm, your symptoms may return within 1 or 2 weeks. Thanks and may you have a good understanding about this drug ZELNORM. You may want to share this book with your family and friends who may be in need of help and would want to use this medicine. Take care, and as always, be well!
